Hygiene Promotion Box (HP Box)

Indonesia Adaptation

August 2012
Why adapt the standard HP Box?

Having prepositioned hygiene promotion materials which are locally adapted and relevant, means we can:

1. Begin HP interventions quickly in the first phase of an emergency
   - no procurement required
   - volunteer training & mobilization can begin immediately
2. Using context relevant & materials already developed by NS
   - Cost saving by removing un-useful materials
3. Improve the quality of HP interventions in emergencies
   - greater impact in reducing water & sanitation related diseases
Overview of Adaptation Process

- 1 Workshop in November 2011
- 6 months of advocacy
- 1 month ++ procurement process
- Cost = IDR 8\textsuperscript{,}928\textsuperscript{,}780 /set
  = CHF 930 *

*For exchange rate IDR 9’600,/-CHF 1
What is in the Indonesia HP Box?

- 1 x Activity Kit
- 1 x Training Kit
- 1 x Banner Kit
- 1 x Hygiene Kit sample
- IEC materials
- Reference books
- Loud speaker & PMI vests
The Boxes/Containers

One set of the HP box contains two large boxes of 135 liters size with wheels and handles to make transporting easier.

Except for large items like tarpaulin and banners, the contents of the HP box are stored in three separate smaller boxes of 15 liters and one 25 liters box (according to its usage).

All of the boxes are light weight, lockable, stackable, water tight and the most important is widely available in the market.
Activity Kit

The equipments to support fun and interesting activities to deliver hygiene message.

The contents of the Activity kit are:
2 set of glo-germ + UV lamps
2 set of Hand Puppet  (4 characters per set)
Large Snake and ladder game
Instruction of using glo-germ
Instruction and script of hand puppet.
Stored in the 15 liters size box
Training Kit

The contents of the Training kit are various stationeries to support a hygiene promotion activity and training.

The items are:

1. **HVS paper and color paper**
2. **Markers and highlighters**
3. **Ball pens and pencils**
4. **Scissors**
5. **Post it**
6. **Blue tack**
7. **Masking tape etc.**

All items are stored in a 25 liters box
The contents of the banner kit are everything to create hygiene message or for visibility:

1. Acrylic paint
2. Various size of painting brushes
3. Paint Remover
4. Stencils
5. Indonesian Red Cross Flags
6. Indonesian Red Cross Logo Stickers
7. Safety gloves and rope
8. One blank banner

All items stored in the 15 liters size box (except the blank banners)
Banner (included in banner kit)

There are three banners (size 1.5 x 2 meters), with three key hygiene messages and one blank banner.

The key hygiene messages are:
1. Safe water storage
2. Washing hand at critical times
3. Usage of toilet
Hygiene Kit Sample

There is also a 15 liter box containing a sample Hygiene Kit of the PMI standard. The sample can be used as demonstration material for the community where PMI hygiene kits are distributed. The contents of the kit are:

1. Bath soap and shampoo
2. Detergent
3. Tooth brushes and tooth paste
4. Towel
5. Sanitary napkin
6. Dish washing soap

All items stored in the 15 liters size box
Books and guidelines as reference in conducting hygiene promotion, includes:

1. PHAST Guide (Bahasa Indonesia version)
2. HHWTS manual (Bahasa Indonesia version)
3. Sphere handbook (Bahasa Indonesia version)
4. WatSan In Emergency Standard Operational Procedure Guide
The IEC materials included in the HP box are (all in Bahasa Indonesia language):

1. Flipchart with hygiene message
2. Laminated PHAST picture
3. Pocket Chart
4. Posters
Other Items

To support the hygiene promotion activities the HP box also includes:

- **Waist Speaker**
  2 set of 15 watt Light weight hands-free speaker with rechargeable batteries, USB slot with embedded MP3 player (can be used for pre-recorded puppet show dialog)

- **PMI vest**
  Dark blue standard PMI vest
Key differences from standard HP Box?

- Glo-germ activity and snake a ladder game included
- Puppets (and scripts) are pre-made
- PHAST toolkit from Indonesia ethnicities used
- 3 banners pre-made with key hygiene messages
- All instruction sheets/IEC materials/reference books are in Bahasa Indonesia language
- All items locally purchased in market ⇒ cheaper & easily replaceable during or after an emergency
