International  
Development

- 
- What are your first impressions of this picture?
  - Identify what the people are doing in this picture.
  - Identify the state of the river, the forest and the houses.
  - How have these changes occurred?
  - Do people downstream have the same right to a clean, healthy river system as those living upstream?
  - In what way do they suffer the consequences of someone else's actions? How can these people protect their livelihoods?
-

- [a]
- What is occurring in this picture? Describe the actions of the people and their connection to the river.
  - In what ways do the villagers actions affect the quality of the river?
  - How does the quality of the river affect the health of the people?

- [b]
- What is occurring in this picture?
  - What do you see as the consequences of this transaction for:
    - the person who sells the fish
    - the person who buys the fish
  - If you were the one selling the fish, how many fish are you prepared to sell for money?
  - Who owns the fish before they are sold?
  - What happens when everyone along the river starts to sell fish? How many fish should be left for the villagers themselves?
  - What say do people downstream have as part of the transaction?

- [c]
- Explain what is occurring in this picture?
  - What is the connection between going to the doctor and river health?
  - What are the health impacts of a polluted river?
  - How does a river become polluted?

- [d]
- What are these children doing?
  - Imagine a situation where you could not go for a swim in your local river? Why would this happen?
  - Have you heard of this happening before?

- [e]
- What do you see in this picture? What are these people doing?
  - How does education help us to look after our rivers?
  - Is there a similarity between this picture and what we are doing now?

- [f]
- Tell us about this picture - what are these people doing?
  - How would river health affect these people?
  - In what ways could these people pollute the river?

[a]

[f]

[b]

[e]

[c]

[d]

- 
- [a]
- What are the people doing in this first picture?
  - What are they using the river for?
  - How would the river health affect the hopes, dreams and actions for people in this picture?
- 

- [b]
- Describe this picture.
  - Do we need a clean healthy river system for people only?
  - What is the link between this fish in the river and communities?
  - How are the communities downstream affected by a clean environment?
- 

- [c]
- What do you think these two men are shaking hands on?
  - What is the connection between this picture and the previous one?
  - Why do you think young people are included in this picture?
  - Who are excluded from this picture?
- 

- [d]
- What are these young children doing?
  - How do young people's actions affect the health of the river?
  - What is the connection between this picture and the previous ones?
-

[a]

[b]

[c]

[d]

- 
- List the different groups of people in this picture - What groups in society do they represent?  
ie. [a] schools [b] church [c] family [d] children  
[e] government [f] environment
  - How are these groups connected to the picture in the centre?
  - What role do these groups have in looking after our rivers?
-

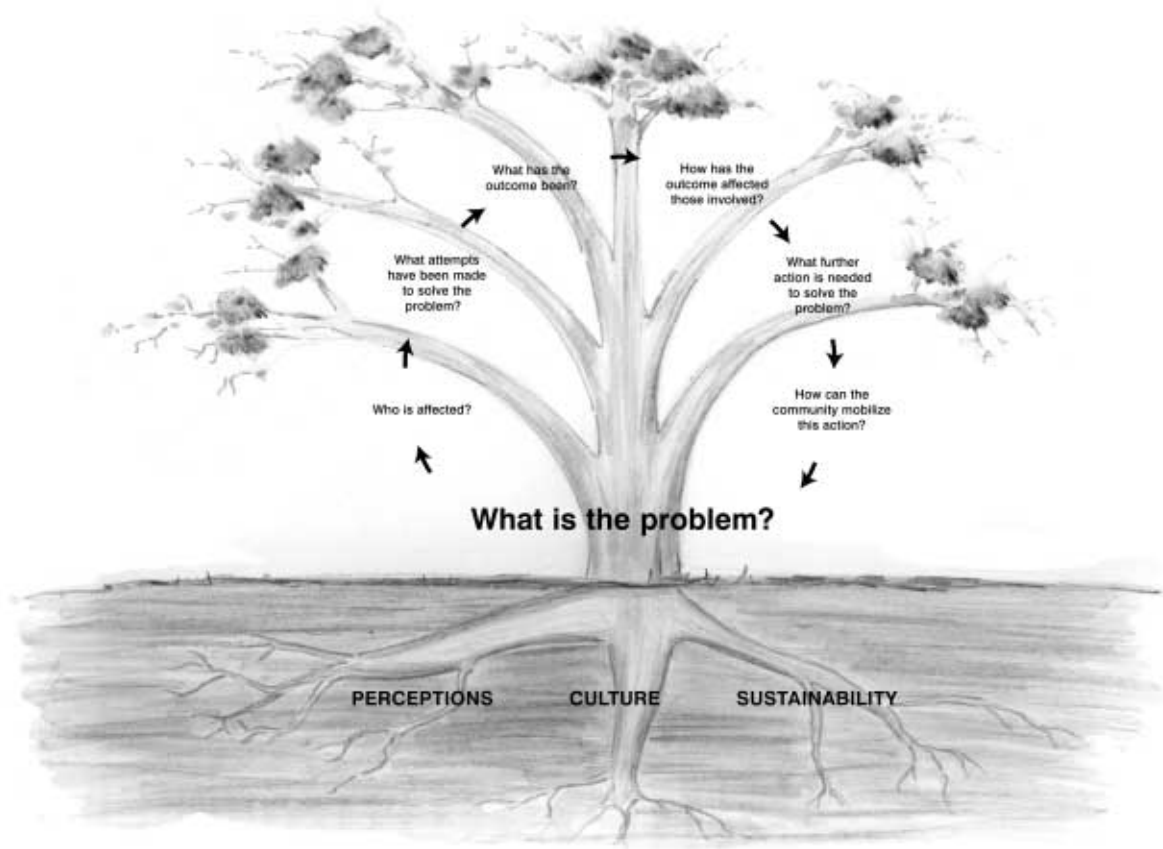

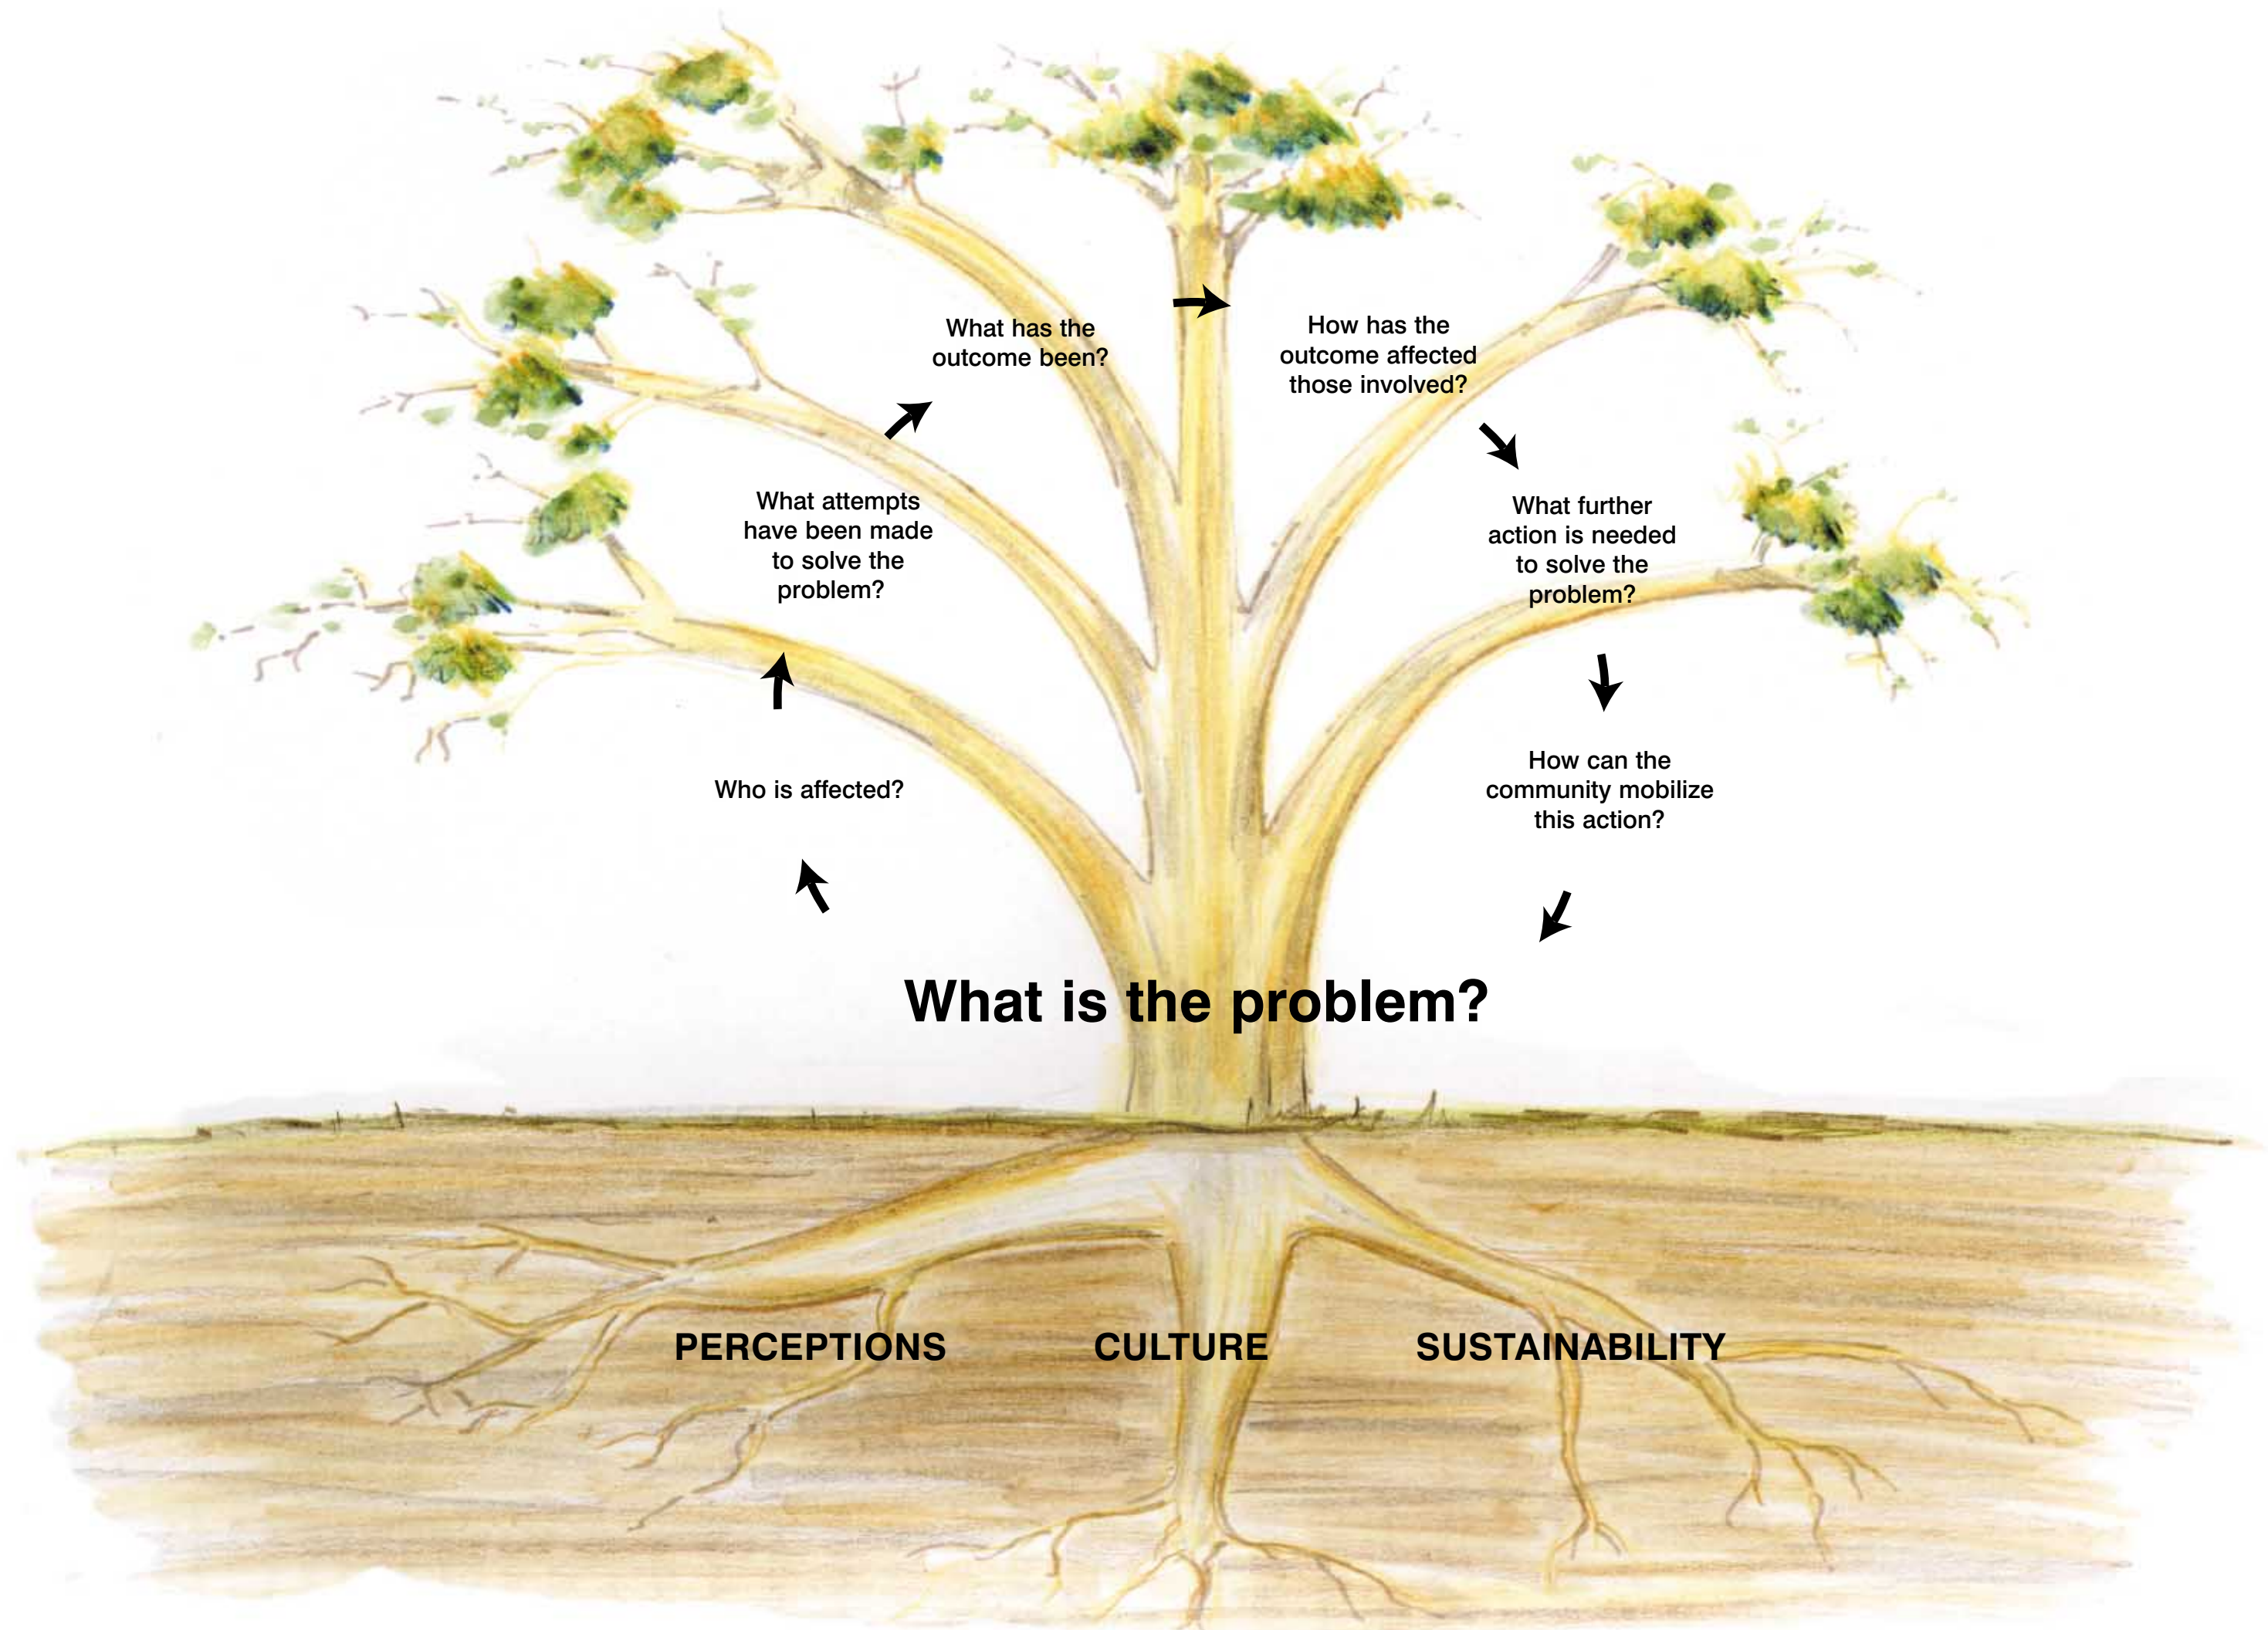

- 
- What are your first impressions of this picture? Describe what you see.
  - What is the role of men in community / environmental decision making?
  - What is the role of women in community / environmental decision making?
  - Who should be involved in discussing environmental matters that affect our rivers?
  - What would be the benefits of including women and those living downstream in decision making?
  - What can you see as potential consequences of not including everyone who is affected by river health?
-

- 
- **What is the problem?**
  - **Perceptions - Culture - Sustainability**
  - **Who is affected?**
  - **What attempts have been made to solve the problem?**
  - **What has the outcome been?**
  - **How has the outcome affected those involved?**
  - **What further action is needed to solve the problem?**
  - **How can the community mobilize this action?**
-

**What is the problem?**

Who is affected?

What attempts  
have been made  
to solve the  
problem?

What has the  
outcome been?

How has the  
outcome affected  
those involved?

What further  
action is needed  
to solve the  
problem?

How can the  
community mobilize  
this action?

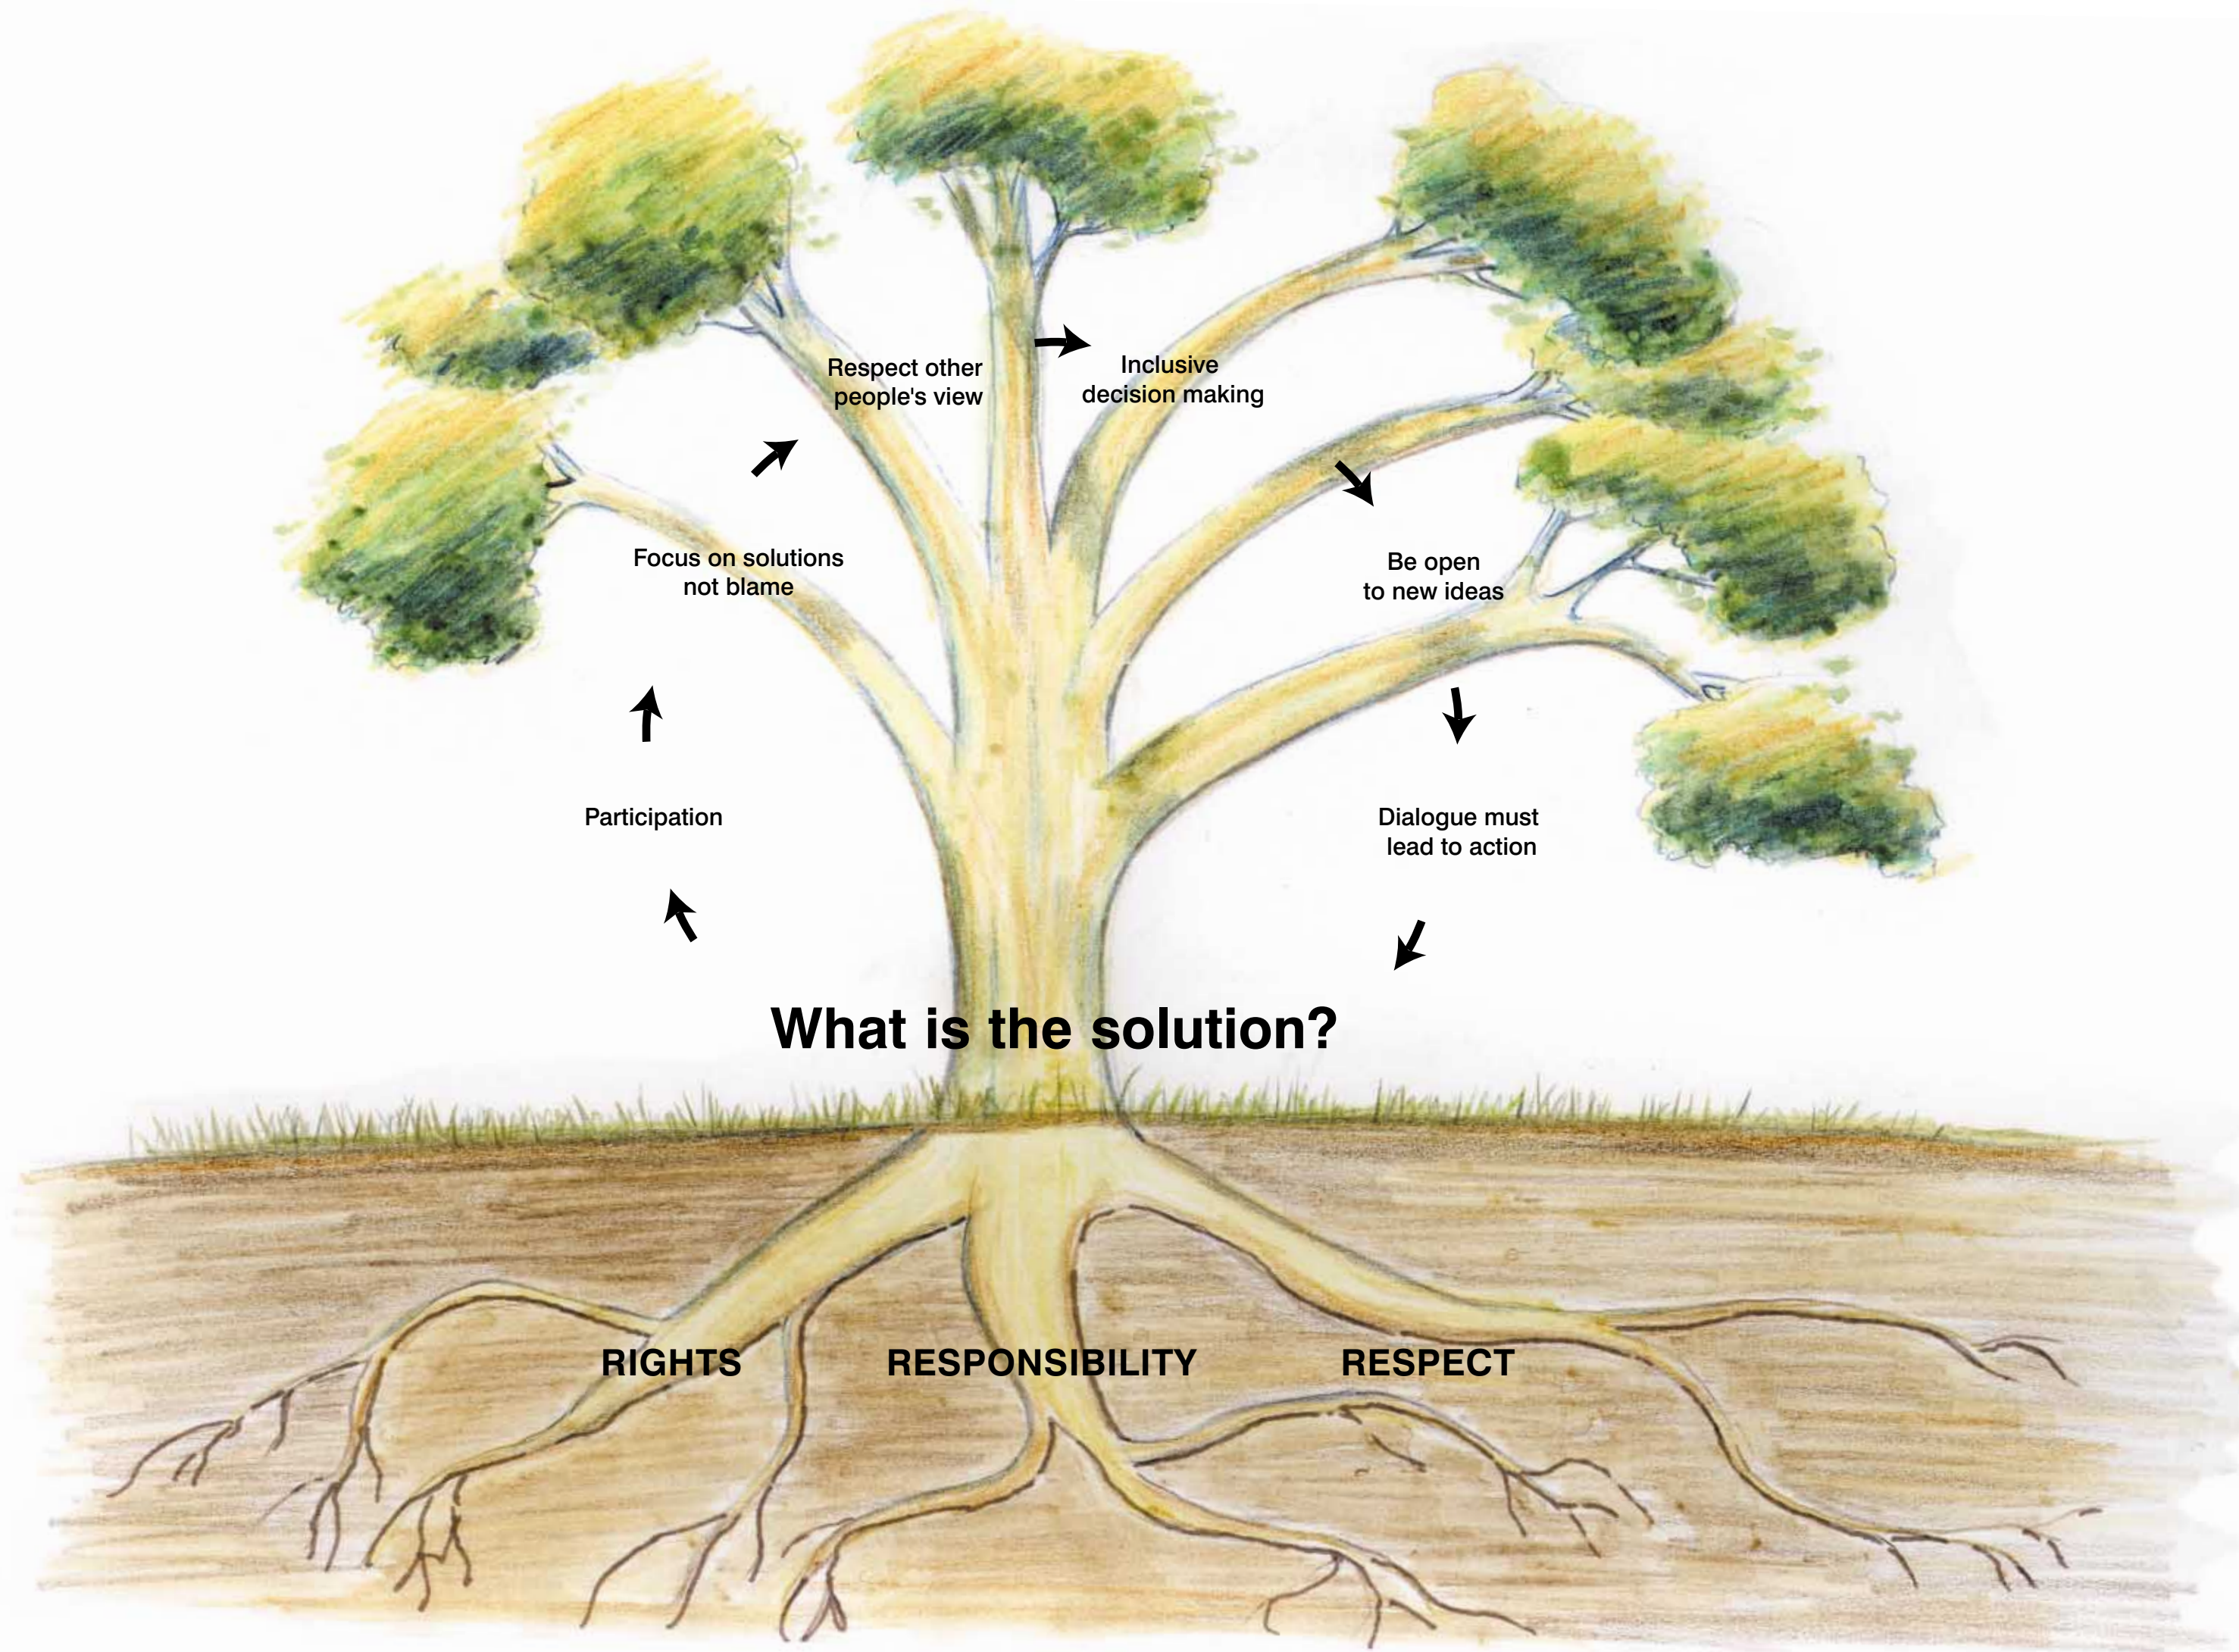

**PERCEPTIONS**

**CULTURE**

**SUSTAINABILITY**

- 
- **What is the solution?**
  - Rights - Responsibility - Respect
  - Participation
  - Focus on solutions not blame
  - Respect other people's view
  - Inclusive decision making
  - Be open to new ideas
  - Dialogue must lead to action
-

## Facilitator's Notes:

---

### Before you start:

- Make sure the group is no more than 10 people
  - Explain to the group why you are there and what you can do for the group
  - Place the group in a circle with every group member sitting down
- 

### During the discussion:

- Be friendly and speak slowly
  - Show your respect for the group and individuals in the group
  - Your opinion is not important - you are seeking the opinion of others
  - Only ask questions
  - Be open to ideas and be flexible
  - Allow for everyone to express their opinion
- 

### Ending the discussion:

- Make sure everyone has had a chance to speak
  - Ask the group 'what they will do next to build understanding with communities up-stream or down-stream.
  - Give the group the opportunity to arrange another discussion
  - Thank people for their time
- 

### Most importantly:

- Every discussion must lead to an action even if it is a small action.
  - Encourage the group to meet again after the action to plan further
-
