## General information

- Manufactured in vermin and termite proof polypropylene. Lightweight and strong with rigid, smooth surface for easy cleaning. Feet placement areas designed to prevent slipping.
- Can be used on shallow or deep trench up to 600mm wide with additional support and bearing onto the ground provided by poles or timbers at least 1200mm long.
- The squatting plates should be attached to the timbers or poles using the cable binders. There are slots provided along the edges of the squatting plate. It may be necessary to provide for further fixing in front of & behind each footplate.
- The squatting plates may also be used over drilled or augered holes up to d. 450mm without any additional supporting.
- The plates may be used on a supporting slab or planks of timber and earth, over large pits to provide a hygienic surface with a well fitted lid.
- Each stack contains: -10 x Squatting Plates -10 x Squatting plate drop hole covers with handles

-80 x cable ties -Packing list, users notes & leaflet. 1 pallet contains 6 stacks.
